### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Wei Te Chung on June 25, 2004.

The application has been amended as follows:

In claim 1 line 19, after "terminals" insert --, wherein each of the pressing mechanisms comprises a first shaft attached to the lid, a second shaft mounted to the outer housing, and a pair of operating levers engaged between the first shaft and the second shaft, wherein the leaf spring comprises a pair of ear portions and a main body, each ear portions defining a through hole, wherein the leaf spring is mounted to the first shaft through the holes of the ear portions and positioned between the operating levers, and wherein each of the operating levers comprises a pivot hole in an end thereof for pivotally attached the operating lever to the second shaft, and a mounting hole in an opposite end thereof for mounting the operating lever to the first shaft--.

Cancel claim 2-5, 17 and 18.

The following is an examiner's statement of reasons for allowance: the prior art fails to show or suggest a test connector with a connector body, a lid, guiding mechanisms and pressing mechanisms, wherein when the lid is in an upper position, the pressing mechanisms are in a first position in which leaf springs are disengaged from an IC package, while when the lid is in a lower position, the pressing mechanisms are moved to a second position in which the leaf springs are engaged with the IC package, thereby mechanically and electrically connecting the IC package to the terminals, and wherein the leaf spring is mounted to a first shaft through holes of the ear portions of the spring and positioned between operating levers, and wherein each of the operating levers comprises a pivot hole in an end thereof for pivotally attached the operating lever to the second shaft, and a mounting hole in an opposite end thereof for mounting the operating lever to the first shaft.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Felix O. Figueroa whose telephone number is (571) 272-2003. The examiner can normally be reached on Mon.-Fri., 10:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (571) 272-2800 Ext. 33. The fax phone
